

SIGN A PETITION TO STOP PROPOSED FUNDING CUTS TO MENTAL HEALTH SERVICES IN SACRAMENTO COUNTY

Short-term savings from budget cuts of mental health will lay the seeds for long-term crises. We clearly understand that something must be done to solve the budget problem, but this does not mean the County needs to turn its back on individuals and family members affected by the disabling effects of mental illness and ignore the serious consequences for taxpayers.

DO SOMETHING!

**SACRAMENTANS
AGAINST BUDGET CUTS
OF MENTAL HEALTH**

Further budget cuts of mental health services will undoubtedly cost the taxpayers far more in increased costs in public hospitals, emergency police calls, inappropriate utilization of emergency room services, involuntary psychiatric hospitalizations, the criminal justice system and Child Protection Services (CPS).

If the goal of Sacramento County is to do more with less during times of economic hardship, cutting funds for mental health services during difficult economic times is counterproductive.
