Please join us on April 7th to say NO to cuts for RST's, self-help services, housing, advocacy, supports, and client jobs. 2009/10 fiscal year would wipe out programs that have kept clients working, going to school and living with their families. These cuts will eliminate the county's ability to provide outpatient mental health services to anyone who does not have full scope Medi-Cal coverage.

Short-term savings from budget cuts of mental health will lay the seeds for long-term crises. If you have the chance, come up to the County Administration Building and share your support for mental health programs.
